

The Oculus Production System (OPS)[™]

"The secret to getting more jobs done faster"

SERVING MANUFACTURERS STRUGGLING WITH GROWTH AND PROFITABILITY.

Shop Scheduler | Manufacturing Planning and Control

The Oculus Production System (OPS) is a Lean flow manufacturing system focused on increasing throughput, reducing waste, maintaining quality and driving out stress at every step!

OPS is a total management solution designed for sign shops, print shops and custom manufacturers. It is not software but works with any ERP or no ERP.

You'll get everything you need to be producing more jobs faster in 12-weeks or less including visual scheduling that facilitates everyone's involvement and the desperately needed communication throughout the shop, proprietary Excel planning, scheduling and tracking tools, customizable forms and reports, process guides for training your people, and a plan for continuous improvement.

In addition you learn the steps to implementing the program with examples and coaching to help you apply it to your situation... and much more.
